

Favorite Classic & Display Faces

MicroLogic Software

for IBM Personal Computers

It takes all types...

for your type of image

Formal, casual, flashy, conservative, wild, or regal — each typeface you use creates a different impression. Now you can tailor your image to suit each occasion by selecting the “right type” from the Classic and Display Faces listed on the following pages.

for your type of application

Since our typefaces are packaged with a conversion utility you can use your favorite faces with *all* of the following applications:

- The MoreFonts type-scaling system for WordPerfect, LetterPerfect, MS Word, and all Windwos 3.0 applications.
- Adobe Type Manager (ATM), TypeAlign, Illustrator, SuperPrint, CorelDRAW, Designer, and any other programs supporting the hinted PostScript Type 1 typeface format.
- Type Director 2.0, Express Publisher 2.0, Calendar Creator Plus 4.0, Labels Unlimited 3.0, and any other programs supporting the non-hinted Agfa/Intellifont typeface format.
- Powerpak for Windows, WordPerfect, MS Word, Ventura, First Publisher, LabelPro, Avagio, and any other programs supporting the hinted Atech typeface format.
- GeoWorks Ensemble and any other programs supporting the hinted URW typeface format.

More typeface formats are under development and will be available soon. This means that the typeface library you start building today can be used with even more of your type-scaling applications tomorrow.

with your type of effects

Only MoreFonts lets you choose from 1000's of special effects. When black type isn't enough, you can attract attention by combining your choice of patterns, outlines, shadows, and reverse type for eye-catching variety.

at your type of price

Unlike most type vendors, our typefaces are developed internally. As a result, expensive typeface royalties are *not* passed on to you.
